Subject Index

A
Abies mariessi; regeneration microhabitat of subalpine conifers 423
Abies: gap regeneration and microsite effect 617
above-ground biomass; slope aspect differences in Mediterranean woody formations 335
acetylene reduction method; non-symbiotic nitrogen fixation in forest ecosystems 183
acorn; guild structures of seed insects of two oaks 145
adult preference; preference and performance in ladybirds 405
advanced regeneration; dynamic steady state of a mixed dipterocarp forest 85
Aesculus (Hippocastanaceae); nutrient composition of seeds (Note and Comment) 803
age–sex; age–sex class and diet of Japanese monkeys 759
aggression; ant defence system 395
aggressivity; analysis of competition indices 29
agonistic behaviors; agonistic behaviors of rat-like hamsters 309
agriculture; rice field use by birds; 569
agro-ecosystem
  growth and reproduction of *Ottelia* 687
  growth and reproductive ecology of *Blyxa* 249
allochthonous prey input; bird foraging in a riparian forest 913
allometry
  morphology and growth of saplings 509
  vegetative sprouting of *Scaphium longiflorum* 641
amphipods
  predator impact on decomposition processes 415
  Do shredders facilitate collectors? 319
animal–plant interaction; hoarding behaviors of wood mice 127
ant–plant mutualism; variation in plant defense in *Macaranga* 765
ant–plant–homopteran symbiotic mutualism; ant colony size in ant–plant *Macaranga* 775
aphids; ant defence system 395
Apodemus spp.; hoarding behaviors of wood mice 127
arbuscular mycorrhizal; effects of nitrogen, phosphorus and arbuscular mycorrhizal fungi on *Salix* (Note and Comment) 165
aridity; slope aspect differences in Mediterranean woody formations 335
autogamy; growth and reproduction of *Ottelia* 687
autologistic regression; local effects on survival of tropical trees 859
automatic camera; fig foraging by Yakushima macaque 49
avian predation; effect of birds on insect leaf damaging 387

B
bacterial diversity; functional succession of bacterioplankton 905
bamboo; morphology and growth of saplings 509
Barro Colorado Island; local effects on survival of tropical trees 859
beech; morphology and growth of saplings 509
benthivore; overlapping territory of a Morwong 715
Bernoulli; wind dispersal of tree seeds 877
Betula platyphylla var. *japonica*; effects of ectomycorrhzial and endophytic fungi 117
BIODEPTH project; community diversity and invasion 819
biodiversity
  biodiversity field experiments 833
  community diversity and invasion 819
  diversity and stability in ecosystems 65
  ecology of termites 941
BIOLOG; functional succession of bacterioplankton 905
biomass estimation method; regional forest biomass estimation (Note and Comment) 587
biomass expansion factor (BEF); regional forest biomass estimation (Note and Comment) 587
biomass; post-fire succession in chaparral 471
bird foraging behavior; bird foraging in a riparian forest 913
bi-stability; stability of competion; migration systems 359
body composition; benefit of mass reduction 197
body size
  age–sex class and diet of Japanese monkeys 759
  overlapping territory of a Morwong 715
boreal forest; regional forest biomass estimation (Note and Comment) 587
Borneo; variation in plant defense in *Macaranga* 765

breeding success; foraging and breeding of cormorant 745
buckling safety factors; vegetative sprouting of *Scaphium longiflorum* 641

C
cannibalism; performance of cannibalistic salamander 73
cannibalistic morph; performance of cannibalistic salamander 73
canopy gap; gap regeneration and microsite effect 617
carbon dioxide fertilization effect; evaluation of carbon sink into forest soil 671
carbon dioxide sink; evaluation of carbon sink into forest soil 671
carbon storage; successional diversity and forest ecosystem function 895
carbon utilization profile; functional succession of bacterioplankton 905
cased caddisfly larvae; caddisfly response to predator and food 705
Castanopsis cuspidata; hoarding behaviors of wood mice 127
caterpillars; effect of birds on insect leaf damaging 387
Cervus nippon
alternative foods for sika deer 257
Cervus nippon; induced resistance of *Damnacanthus indicus* (Note and Comment) 809
Changjiang Estuary; life history trade-offs in *Scirpus mariqueter* 263
chaparral; post-fire succession in chaparral 471
Cheilodactylidae; overlapping territory of a Morwong 715
China; regional forest biomass estimation (Note and Comment) 587
Cirsium kamtschaticum; preference and performance in ladybirds 405
clear-cutting and burning; clear-cutting and burning in a plantation 531
climatic factor; tree growth in northern Japan 435
climbing mechanism; liana diversity in the Indian Eastern Ghats 519
clonal propagation; life history trade-offs in *Scirpus mariqueter* 263
CO_2-temperature gradient; CO_2-temperature gradient chamber 347
coccids; ant colony size in ant–plant *Macaranga* 775
coevolution; cospeciation of ants and plants 787
coexistence
mutualism of phytoplankton and bacteria 289
theoretical ecosystem conservation 983
colonization
litter quality effects on shredders 173
stochasticity of species assemblage 887
community ecology; quantitative food webs 925
community stratification; drospholipid diversity in birch forests 369
community structure; community diversity and invasion 819
competition
body size and predator effect on salmon 327
tree growth in northern Japan 435
conservation
growth and reproduction of *Ottelia* 687
growth and reproductive ecology of *Blyxa* 249
corm; life history trade-offs in *Scirpus mariqueter* 263
cover; post-fire succession in chaparral 471
crayfish; Do shredders facilitate collectors? 319
Crematogaster; cospeciation of ants and plants 787
Crematogaster; variation in plant defense in *Macaranga* 765
Cricetulus triton; agonistic behaviors of rat-like hamsters 309
cross-population pressures; stability of competion; migration systems 359

D
daily dispersal; emergency patterns of subtidal invertebrates 1
daily emergence; emergency patterns of subtidal invertebrates 1
Daphnia galeata; life history elasticity of *Daphnia* 41
dark septate endophytes; effects of ectomycorrhzial and endophytic fungi 117
data analysis; biodiversity field experiments 833
decomposer; ecosystem organization model 975
density effect; performance of cannibalistic salamander 73
density; post-fire succession in chaparral 471
detrended canonical correspondence analysis; stochasticity of species assemblage 887
detritivorous invertebrate; predator impact on decomposition processes 415
detritus food web; templates of food-habitat resources 961
diel periodicity; caddisfly response to predator and food 705
diet selection; age–sex class and diet of Japanese monkeys 759
dispersal simorphism; seed germination and dispersal of *Penthorum* 99

dispersal; evolution of dispersal (Note and Comment) 157
disturbance; pseudoscorpions and forest management (Note and Comment) 593
diversity
  ecosystem organization model 975
  successional diversity and forest ecosystem function 895
diving; foraging and breeding of cormorant 745
domestication; body size and predator effect on salmon 327
dwarf bamboo; constant leaf mass of *Sasa tsuboiana* 459

E
ecological evolution; ecology of termites 941
ecological risk assessment; life history elasticity of *Daphnia* 41
ecosystem conservation; theoretical ecosystem conservation 983
ecosystem model; century ecosystem modelling 497
ecosystem organization; ecosystem organization model 975
ecosystem processes; soil biodiversity: function implications 845
ecotoxicology; life history elasticity of *Daphnia* 41
Ecotron; soil biodiversity: function implications 845
ectomycorrhizae; effects of ectomycorrhzial and endophytic fungi 117
effective population size; skewed reproductive success among male charr 727
elevated surfaces: gap regeneration and microsite effect 617
endangered frog; food of the Daruma pond frog 737
endangered species; mortality factor of an endangered pine species (Note and Comment) 795
endemic plants; vegetation–environment relationships 627
energetics; ecology of termites 941
energy-supplying organ; benefit of mass reduction 197
environmental gradient; stochasticity of species assemblage 887
Epilcahna pustulosa; preference and performance in ladybirds 405
erosion control dam; skewed reproductive success among male charr 727
evergreen; needle gas exchange in an alpine 107
evolution; female multiple mating as genetic bet-hedging 605
experimental design; biodiversity field experiments 833

F
farmlands; fallow farmlands as waterbird habitats 555
feeding behavior; waterbird diversity in a lake lagoon 543
female multiple mating; as genetic bet-hedging 605
Ficus; fig foraging by Yakushima macaque 49
field-like conditions; CO_2-temperature gradient chamber 347
fig foraging frequency; fig foraging by Yakushima macaque 49
fine particulate organic matter; Do shredders facilitate collectors? 319
fire; post-fire succession in chaparral 471
fish–habitat relationships; fish–habitat relationships in Hokkaido 233
flight cost; benefit of mass reduction 197
floaters; intraspecific parasites in grey starling 221
flooded field; rice field use by birds; 569
fluvial–lacustrine migration; use of $\delta^{13}N$ to trace a migratory fish 697
food analysis; food of the Daruma pond frog 737
food availability; foraging and breeding of cormorant 745
food body; ant colony size in ant–plant *Macaranga* 775
food habits; alternative foods for sika deer 257
food limitation; alternative foods for sika deer 257
food resource partitioning; overlapping territory of a Morwong 715
food shift; alternative foods for sika deer 257
food webs
  diversity and stability in ecosystems 65
  quantitative food webs 925
foraging behavior; foraging and breeding of cormorant 745
foraging height; effect of snow on behavior of great tit 301
foraging; ant defence system 395
forest dynamics; gap regeneration and microsite effect 617
forest ecosystem; evaluation of carbon sink into forest soil 671
forest ecosystems; non-symbiotic nitrogen fixation in forest ecosystems 183

forest floor: gap regeneration and microsite effect 617
forest inventory; regional forest biomass estimation (Note and Comment) 587
forest management; pseudoscorpions and forest management (Note and Comment) 593
forest; successional diversity and forest ecosystem function 895
forest-stream ecotone; bird foraging in a riparian forest 913
freshwater ecosystems; diversity and stability in ecosystems 65
functional classifications; ecology of termites 941
functional group
  templates of food-habitat resources 961
  community diversity and invasion 819
functional succession; functional succession of bacterioplankton 905
fungi; fungal decomposition of beech leaf litter 649

G
gap mosaic; dynamic steady state of a mixed dipterocarp forest 85
genetic bet-hedging; female multiple mating as genetic bet-hedging 605
global warming; CO_2-temperature gradient chamber 347
grassland diagnosis; spatial heterogenity in grassland 487
grazing activity; caddisfly response to predator and food 705
great tit; effect of snow on behavior of great tit 301
grey starling; intraspecific parasites in grey starling 221
growth flexibility; morphology and growth of saplings 509
growth rate; performance of cannibalistic salamander 73
guild; guild structures of seed insects of two oaks 145

H
habitat complexity; drospholipid diversity in birch forests 369
habitat fragmentation; skewed reproductive success among male charr 727
habitat heterogeneity; evolution of dispersal (Note and Comment) 157
habitat preference; rice field use by birds; 569
habitat segregation; habitat segregation between two stream gobies 205
Hakkoda Mountains; mire vegetation in AD 915 275
head width; performance of cannibalistic salamander 73
herbivore fauna; variation in plant defense in *Macaranga* 765
herbivorous damage; woody plant establishment on fresh volcanic deposits 451
heterogeneity; biodiversity field experiments 833
hierarchy; theoretical ecosystem conservation 983
Hokkaido; fish–habitat relationships in Hokkaido 233
holocellulose; fungal decomposition of beech leaf litter 649
host trees; liana diversity in the Indian Eastern Ghats 519
Hynobius retardatus metamorphosis; performance of cannibalistic salamander 73

I
inclement weather; breeding of bull-headed shrikes 55
Indian Eastern Ghats; liana diversity in the Indian Eastern Ghats 519
indirect effects
  body size and predator effect on salmon 327
  mutualism of phytoplankton and bacteria 289
  quantitative food webs 925
individual growth; tree growth in northern Japan 435
Indonesia; vegetative sprouting of *Scaphium longiflorum* 641
induced response; induced resistance of *Damnacanthus indicus* (Note and Comment) 809
information processing; ant defence system 395
insect leaf damaging; effect of birds on insect leaf damaging 387
interspecific competition
  fish–habitat relationships in Hokkaido 233
  habitat segregation between two stream gobies 205
intraspecific brood parasites; intraspecific parasites in grey starling 221

J
Japanese cormorant; foraging and breeding of cormorant 745
Japanese monkey; age–sex class and diet of Japanese monkeys 759
Jarman–Bell principle; age–sex class and diet of Japanese monkeys 759

L
Lake Biwa; use of $\delta^{15}N$ to trace a migratory fish 697
landscape elements; waterbird diversity in a lake lagoon 543
landscape
dynamic steady state of a mixed dipterocarp forest 85
stochasticity of species assemblage 887
Lanius bucephalus; inclement weather and breeding of bull-headed shrikes 55
larval performance; preference and performance in ladybirds 405
latidudianal clines; drospholipid diversity in birch forests 369
lattice model; evolution of dispersal (Note and Comment) 157
Leach's storm-petrel; benefit of mass reduction 197
leaf habit; morphology and growth of saplings 509
leaf litter C:N ratio; litter quality effects on shredders 173
leaf litter toughness; litter quality effects on shredders 173
leaf standing crop; constant leaf mass of *Sasa tsuboiana* 459
leaf-litter processing; predator impact on decomposition processes 415
leafminers
leafminers on *Quercus* 135
quantitative food webs 925
liana diversity; liana diversity in the Indian Eastern Ghats 519
life history
life history elasticity of *Daphnia* 41
evolution of dispersal (Note and Comment) 157
life table; life history elasticity of *Daphnia* 41
lignin; fungal decomposition of beech leaf litter 649
low temperature; needle gas exchange in an alpine 107

M
Macaranga; cospeciation of ants and plants 787
manipulation of nesting boxes; intraspecific parasites in grey starling 221
marine ecosystems; diversity and stability in ecosystems 65
mass reduction; benefit of mass reduction 197
masu salmon; body size and predator effect on salmon 327
Mayfield exposure day method; inclement weather and breeding of bull-headed shrikes 55
metapopulation; evolution of dispersal (Note and Comment) 157
microbial biomass nitrogen; clear-cutting and burning in a plantation 531
microbial decomposition system; templates of food-habitat resources 961
microsite; regeneration microhabitat of subalpine conifers 423
migration; stability of competion; migration systems 359
mire vegetation; mire vegetation in AD 915 275
mixed-species flock; effect of snow on behavior of great tit 301
mixing equilibrium; stability of competion; migration systems 359
mixture; analysis of competition indices 29
model
dynamic steady state of a mixed dipterocarp forest 85
wind dispersal of tree seeds 877
theoretical ecosystem conservation 983
modern analog; mire vegetation in AD 915 275
molecular phylogeny; cospeciation of ants and plants 787
monitoring; vegetation–environment relationships 627
monoculture; analysis of competition indices 29
monopolizing equilibria; stability of competion; migration systems 359
monospecific flock; effect of snow on behavior of great tit 301
mono-stability; stability of competion; migration systems 359
morphological flexibility; morphology and growth of saplings 509
mortality factor; mortality factor of an endangered pine species (Note and Comment) 795
mutualism; mutualism of phytoplankton and bacteria 289
myrmecophyte
cospeciation of ants and plants 787
variation in plant defense in *Macaranga* 765

N
needle water content; needle gas exchange in an alpine 107
nest success; inclement weather and breeding of bull-headed shrikes 55
nestling growth; inclement weather and breeding of bull-headed shrikes 55
network coevolution; ecosystem organization model 975

next-boxes; effect of birds on insect leaf damaging 387
nitrogen mineralization; clear-cutting and burning in a plantation 531
nitrogen
  effects of nitrogen, phosphorus and arbuscular mycorrhizal fungi on *Salix* (Note and Comment) 165
  fungal decomposition of beech leaf litter 649
nitrogen-fixing species; post-fire succession in chaparral 471
non-symbiotic nitrogen fixation; non-symbiotic nitrogen fixation in forest ecosystems 183
northern Japan; tree growth in northern Japan 435
number of microorganism; clear-cutting and burning in a plantation 531

O
oak; leafminers on *Quercus* 135
occurrence data; spatial heterogenity in grassland 487
ontogenetic change in ant defense; ant colony size in ant–plant *Macaranga* 775

P
Panama; local effects on survival of tropical trees 859
parasitic rate; intraspecific parasites in grey starling 221
parasitoids; quantitative food webs 925
patch age; dynamic steady state of a mixed dipterocarp forest 85
Penthorum chinense; seed germination and dispersal of *Penthorum* 99
permanence; mutualism of phytoplankton and bacteria 289
phenotypic plasticity
  growth and reproduction of *Ottelia* 687
  induced resistance of *Damnacanthus indicus* (Note and Comment) 809
Phialocephala fortinii; effects of ectomycorrhzial and endophytic fungi 117
Phosphorus
  effects of nitrogen, phosphorus and arbuscular mycorrhizal fungi on *Salix* (Note and Comment) 165
  fungal decomposition of beech leaf litter 649
photosynthesis; needle gas exchange in an alpine 107
phytoplankton and bacteria model; mutualism of phytoplankton and bacteria 289
pine wilt disease; mortality factor of an endangered pine species (Note and Comment) 795
pine; needle gas exchange in an alpine 107
Pinus armandii var. *amamiana*; mortality factor of an endangered pine species (Note and Comment) 795
Pinus massoniana; clear-cutting and burning in a plantation 531
pioneer plant; effects of ectomycorrhzial and endophytic fungi 117
pioneer trees; woody plant establishment on fresh volcanic deposits 451
plant chemical defenses; nutrient composition of seeds (Note and Comment) 803
plant community; spatial heterogenity in grassland 487
plant cover; slope aspect differences in Mediterranean woody formations 335
plant groups; post-fire succession in chaparral 471
plant population; CO_2-temperature gradient chamber 347
plowing; rice field use by birds; 569
p-nonylphenol; life history elasticity of *Daphnia* 41
pollen analysis; mire vegetation in AD 915 275
polyandry; female multiple mating as genetic bet-hedging 605
population regulation; ant colony size in ant–plant *Macaranga* 775
positive feedback; vegetation–environment relationships 627
power law; spatial heterogenity in grassland 487
precipitation; inclement weather and breeding of bull-headed shrikes 55
predation; body size and predator effect on salmon 327
predator avoidance; caddisfly response to predator and food 705
predatory fish; predator impact on decomposition processes 415
preference-performance correspondence; preference and performance in ladybirds 405
producer; ecosystem organization model 975
productivity
  slope aspect differences in Mediterranean woody formations 335
  successional diversity and forest ecosystem function 895
pseudoscorpion; pseudoscorpions and forest management (Note and Comment) 593
pump system; emergency patterns of subtidal invertebrates 1

Q
Quercus (Fagaceae); nutrient composition of seeds (Note and Comment) 803

Quercus serrata
guild structures of seed insects of two oaks 145
hoarding behaviors of wood mice 127
Quercus variabilis; guild structures of seed insects of two oaks 145
Quercus; effect of birds on insect leaf damaging 387

R
ramet bank; vegetative sprouting of *Scaphium longiflorum* 641
Rampa forests, Eastern Ghats, India; century ecosystem modelling 497
Rana porosa brevipoda; food of the Daruma pond frog 737
rangelands; slope aspect differences in Mediterranean woody formations 335
regression analysis; spatial heterogenity in grassland 487
regulation of branching; constant leaf mass of *Sasa tsuboiana* 459
relative yard; analysis of competition indices 29
reproductive allocation
growth and reproduction of *Ottelia* 687
growth and reproductive ecology of *Blyxa* 249
reproductive success; skewed reproductive success among male charr 727
resource level; caddisfly response to predator and food 705
resource partioning; habitat segregation between two stream gobies 205
resting behavior; waterbird diversity in a lake lagoon 543
restoration; vegetation–environment relationships 627
Rhinogobius sp. (the orange form); use of $\delta^{15}N$ to trace a migratory fish 697
Rhinogobius; habitat segregation between two stream gobies 205
rice cultivation; rice field use by birds; 569
rice field ecosystems; food of the Daruma pond frog 737
rice fields; fallow farmlands as waterbird habitats 555
riparian habitats; effects of nitrogen, phosphorus and arbuscular mycorrhizal fungi on *Salix* (Note and Comment) 165
riparian vegetation; fish–habitat relationships in Hokkaido 233

S
salamander; performance of cannibalistic salamander 73
Salix gracilistyla; effects of nitrogen, phosphorus and arbuscular mycorrhizal fungi on *Salix* (Note and Comment) 165
samara; wind dispersal of tree seeds 877
saponins; nutrient composition of seeds (Note and Comment) 803
Sasa tsuboiana; constant leaf mass of *Sasa tsuboiana* 459
scale; biodiversity field experiments 833
seasonal change; agonistic behaviors of rat-like hamsters 309
seasonality; leafminers on *Quercus* 135
secondary forest; pseudoscorpions and forest management (Note and Comment) 593
seed dispersal by water; seed germination and dispersal of *Penthorum* 99
seed dispersal; hoarding behaviors of wood mice 127
seed disperser; fig foraging by Yakushima macaque 49
seed germination; seed germination and dispersal of *Penthorum* 99
seed insect; guild structures of seed insects of two oaks 145
seed production; life history trade-offs in *Scirpus mariqueter* 263
seedling establishment; regeneration microhabitat of subalpine conifers 423
self-population pressures; stability of competion; migration systems 359
set-aside; fallow farmlands as waterbird habitats 555
shallow subtidal zone; emergency patterns of subtidal invertebrates 1
shredder–collector interaction; Do shredders facilitate collectors? 319
sika deer; alternative foods for sika deer 257
simulation; evaluation of carbon sink into forest soil 671
size variation; growth and reproductive ecology of *Blyxa* 249
small invertebrates; emergency patterns of subtidal invertebrates 1
snow cover; effect of snow on behavior of great tit 301
social physiology; ant defence system 395
soil animals; templates of food-habitat resources 961
soil biodiversity; soil biodiversity: function implications 845
soil carbon balance; evaluation of carbon sink into forest soil 671
soil conditions; woody plant establishment on fresh volcanic deposits 451
soil organic layer; pseudoscorpions and forest management (Note and Comment) 593
spatial distribution of light; constant leaf mass of *Sasa tsuboiana* 459

species composition; slope aspect differences in Mediterranean woody formations 335
species richness
community diversity and invasion 819
fallow farmlands as waterbird habitats 555
post-fire succession in chaparral 471
species–species food preference; litter quality effects on shredders 173
spines; induced resistance of *Damnacanthus indicus* (Note and Comment) 809
stability; diversity and stability in ecosystems 65
stable isotopes; soil biodiversity: function implications 845
stable nitrogen isotope; use of $\delta^{15}N$ to trace a migratory fish 697
stomatal conductance; needle gas exchange in an alpine 107
stream fish; fish–habitat relationships in Hokkaido 233
stream shredder; litter quality effects on shredders 173
stream; Do shredders facilitate collectors? 319
stream; habitat segregation between two stream gobies 205
sub-boreal forest; tree growth in northern Japan 435
succession
post-fire succession in chaparral 471
successional diversity and forest ecosystem function 895
sun-angle-based model; drospholipid diversity in birch forests 369

T
tannins; nutrient composition of seeds (Note and Comment) 803
temperate forest; regional forest biomass estimation (Note and Comment) 587
tephrochronology; mire vegetation in AD 915 275
territory overlap; overlapping territory of a Morwong 715
timberline; needle gas exchange in an alpine 107
Tomakomai Experimental Forest; stochasticity of species assemblage 887
topographic factor; tree growth in northern Japan 435
trade-off; life history trade-offs in *Scirpus mariqueter* 263
tree height; woody plant establishment on fresh volcanic deposits 451
tree regeneration; woody plant establishment on fresh volcanic deposits 451
tree ring width; mortality factor of an endangered pine species (Note and Comment) 795
trellises; liana diversity in the Indian Eastern Ghats 519
tri-stability; stability of competion; migration systems 359
trophic cascading effect; predator impact on decomposition processes 415
tropical forests; local effects on survival of tropical trees 859
tropical rainforest; dynamic steady state of a mixed dipterocarp forest 85
Tsuga diversifolia; regeneration microhabitat of subalpine conifers 423
turbulence; wind dispersal of tree seeds 877

U
ultramafic soils; vegetation–environment relationships 627
undergrowth; regeneration microhabitat of subalpine conifers 423
updraft; wind dispersal of tree seeds 877
Usu; woody plant establishment on fresh volcanic deposits 451

V
vegetation dynamics; century ecosystem modelling 497
vertical distribution; drospholipid diversity in birch forests 369
volcano; woody plant establishment on fresh volcanic deposits 451

W
water pollution; seed germination and dispersal of *Penthorum* 99
waterbirds; fallow farmlands as waterbird habitats 555
waterfowl; waterbird diversity in a lake lagoon 543
wetland; waterbird diversity in a lake lagoon 543
white-spotted charr; skewed reproductive success among male charr 727
wildlife conservation; food of the Daruma pond frog 737
within-tree variation; leafminers on *Quercus* 135

Y
Yakushima macaque; fig foraging by Yakushima macaque 49
